

Joint Lecture Club 2016

Winterbreak		Title
Jan Chemnitz	13.04.2016	Road Map to Habilitation at the University Hamburg – a Field Report
Jens B. Bosse	11.05.2016	Virus DynOmics: Towards realtime imaging of viral transport processes in whole cells
Thomas Günther	25.05.2016	Exploring viral genomes, epigenomes and transcriptomes by NGS-based approaches
Wilhelm Ching	08.06.2016	Stem Cells - Overview, Application and What I Do
	22.06.2016	ausgefallen
Stephanie Bertram	06.07.2016	Proteolytic activation of human influenza viruses and coronaviruses
Summerbreak		
Ulrike Lange	05.10.2016	HIV latent reservoirs – novel approaches to wake a sleeping provirus
Niklas Beschorner	12.10.2016	Cutting edge antiviral therapies with designer nucleases and recombinases
Carolin Bürck	26.10.2016	Virus-induced obesity – fact or coincidence?
Helga Hofmann-Sieber	09.11.2016	26 Years of Gene Therapy – an Overview
Wilhelm Salzberger	23.11.2016	Managing chronic viral infections – Progress and Challenges
Nilgün Tekin-Bubenheim	07.12.2016	Virus-associated hematologic malignancies
